

Personal Injury & Wrongful Death

Personal injury and wrongful death claims require specialized knowledge and expertise. That's why so many clients rely on MDD. As the world's premier forensic accounting firm, we have helped hundreds of clients assess economic losses from motor vehicle accidents, slips and falls, medical malpractice claims, and other incidents.

We provide clients with a full suite of loss calculations, including:

- Past and future income losses
- Pension losses
- Loss of fringe benefits
- Loss of business value
- Dependency losses
- Future care present value calculations.

MDD will obtain documentation, drill down through the information to carefully study the underlying drivers of the loss, and then deliver a thorough, user-friendly report which will allow both parties to understand the findings and reconcile any differences in assumptions.

We have particular expertise in analysing the records of self-employed business owners and assessing the impact of the incident on their revenues, expenses, and the value of their businesses.

In the case of protracted dealings or court action, our specialists are also skilled at providing expert testimony.

For support in personal injury and wrongful death claims, hire MDD.
